# QUALITY, HEALTH & SAFETY, ENVIRONMENT AND INFORMATION SECURITY POLICY

VA TECH WABAG, a member of the WABAG Group, operates in the following areas: the development, engineering, and design of drinking water, wastewater treatment, sludge treatment, seawater and brackish water desalination, and water recovery/reuse facilities for industrial and municipal sectors with high environmental value, as well as turnkey construction (construction, mechanical, electrical, and automation) and operational management.

**IN OUR WABAG MANAGEMENT SYSTEM**, we have defined our own corporate standards that go beyond current norms, laws, and regulations. In this way, we want to ensure that the systematic monitoring of objectives and the control and improvement of all documented procedures are structurally embedded within our company.

The **WABAG MANAGEMENT SYSTEM** is based on current ISO standards, which provide clear structures and responsibilities and ensure the long-term economic success of our company.

To ensure the sustainability of our management system, we have defined the following corporate quality, occupational health and safety, and environmental protection objectives:

## QUALITY

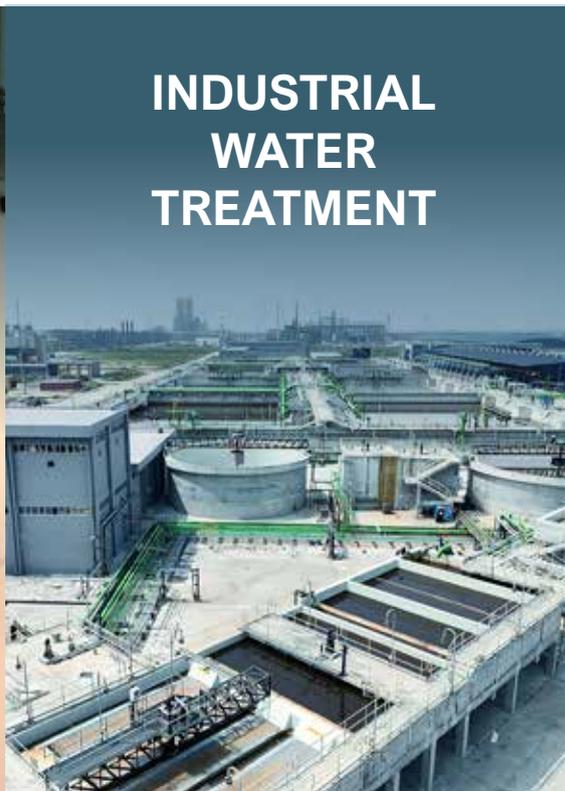

Within the scope of the Integrated Management System, we consider external and internal issues and the needs of all relevant parties. We assess and consider the risks and opportunities for our business.

Our customers' requirements and requests are fully met within the framework of fixed agreements specified in the contract.

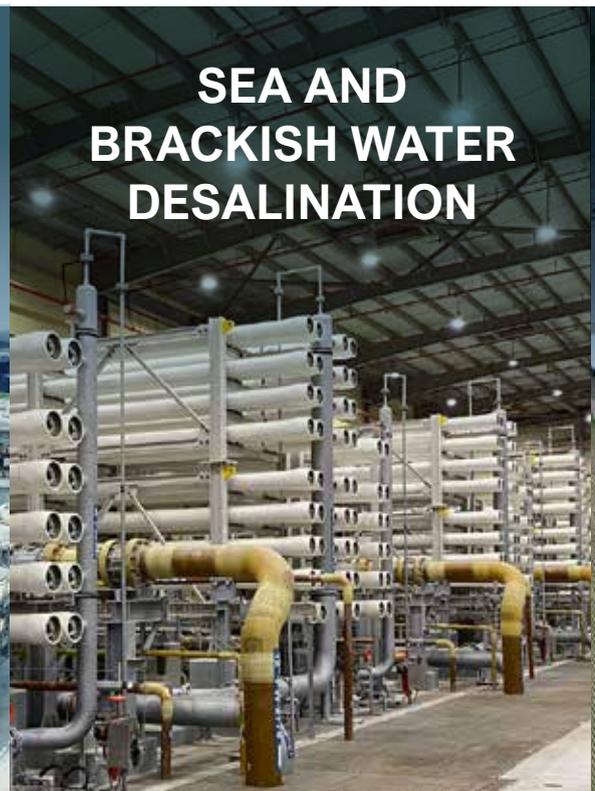

### DRINKING WATER TREATMENT

### INDUSTRIAL WATER TREATMENT

### SEA AND BRACKISH WATER DESALINATION

We control externally provided processes, products, and services. Our external suppliers are expected to place the same importance on quality and consistently meet our requirements.

The full transparency of our management system is ensured by verification carried out by independent external parties. The continuous improvement of our daily processes and learning from experience form the basis of our work.

# OCCUPATIONAL HEALTH AND SAFETY

We identify risks to prevent accidents or occupational illnesses and learn from near misses. Our goal is zero accidents or occupational illnesses.

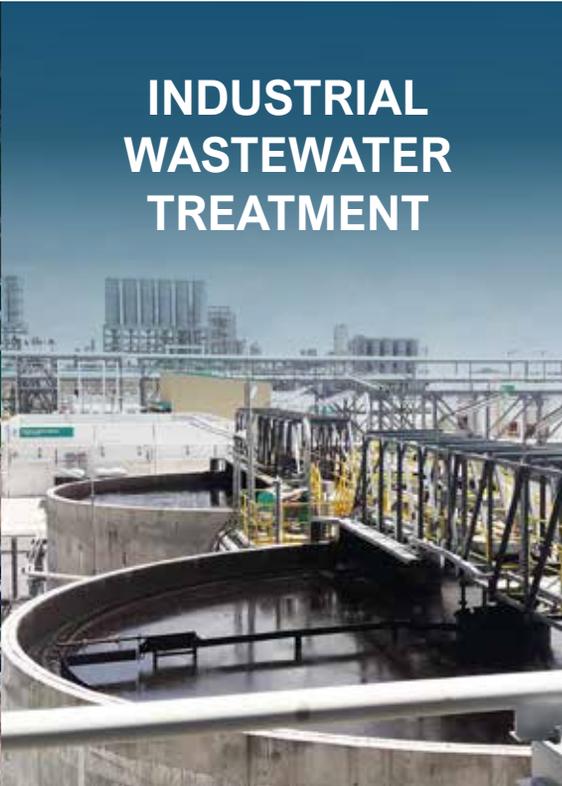

Our employees are our most valuable corporate asset, and we continuously develop their knowledge and help them improve their individual skills and certifications/authorizations. We provide ongoing internal and external training to all relevant parties.

We take care to provide safe working areas to support the physical and psychological health of our own and external personnel and to ensure a positive working environment.

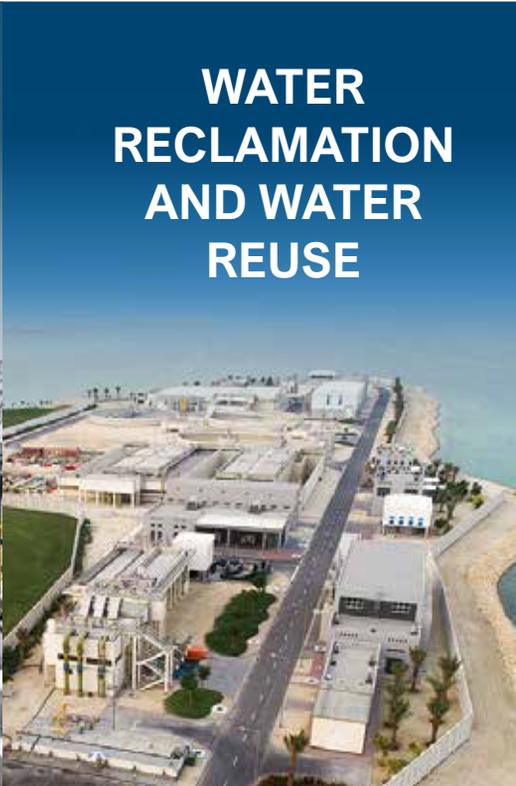

All employees will support and be responsible for the implementation of health and safety measures and related activities at all our locations.

**MUNICIPAL  
WASTEWATER  
TREATMENT**

**INDUSTRIAL  
WASTEWATER  
TREATMENT**

**WATER  
RECLAMATION  
AND WATER  
REUSE**

# ENVIRONMENTAL PROTECTION

We continuously assess environmental factors and prevent negative impacts by defining clear actions and responsibilities.

We prefer green solutions in planning whenever economically and practically feasible.

We minimize environmental impact by limiting resource consumption.

We pay particular attention to protecting the environment through selective waste collection.

As we operate in various markets and countries, we commit ourselves to respect and fulfil the regional and local legal obligations and regulations.

# INFORMATION SECURITY

We implement and continuously improve our Information Security Management System to protect information assets and manage associated risks effectively.

Our experienced and expert staff utilize the most advanced technologies to implement all necessary procedures for the protection and management of data.

As WABAG, we carry out the necessary work for the processing, protection, and management of all company data, including personal data and customer information, in line with both our Global Standards and local requirements.

We effectively manage risks related to Information Security, continuously improve our processes, and closely monitor technological and regulatory developments.

All employees are regularly informed and trained on the processing, protection, and management of data to ensure company-wide compliance and awareness.

Mahmut Gedek  
Managing Director, CEO  
VA TECH WABAG GmbH
